City of CANNING

CANNING SNAPSHOT

› Located 12km from the Perth CBD and with a vision and commitment from Council to be a welcoming and thriving City, there's never been a better time to be part of the Canning community.

› The City's transformation started on the inside with a significant restructure and some big questions and decisions around where the organisation wanted to go. Subsequent endorsements by Council have paved the way in allowing the City to blast into the big, bold direction envisaged by the leadership team.

GETTING HEALTHY FROM THE INSIDE OUT

136 current and future leaders have received targeted leadership training as a result of an Australian Institute of Management (AIM WA) partnership.

Staff have access to over 150 training courses and programs to stretch, grow and cultivate new skills.

Staff are provided with year-round financial, emotional, physical and financial health initiatives as part of a Wellbeing Program.

Appointment of the first Chief Innovation Officer in WA local government focused on building staff capacity in the innovation, engagement and project management spaces.

Cross-functional working groups work together to embed organisational values and improve workplace culture.

Introduction of a new software system to increase efficiencies and reduce costs.

Introduction of a Culture of Care program specifically created to increase care of self, workmates, community, environment, plant and equipment at Canning.

Culture surveys completed across the organisation to create a constructive and engaged workplace culture.

Staff encouraged to think and work differently and given licence to create exciting, new and transformational projects and initiatives.

Integral to Canning's transformation is its investment in people, an understanding at the highest level that if you provide great training, a clear blueprint for delivery and a safe environment to try new things, make mistakes and learn from them, the result will be a highly motivated, creative and output-focused workforce.

GLOBAL LEARNING AND COLLABORATION

Collaboration with Harvard University's Technology and Enterprise Center has enabled multi-disciplinary discussions between senior innovation and technology leaders on relevant topics in society including Smart Cities and sustainability projects.

Harvard University's Dr David Ricketts delivered an Innovation Master Class for Canning and WA local governments to embed innovation in business practices.

Collaboration with the Dubai Government on Innovation Culture, Smart City Projects and Happiness Agenda - www.smartdubai.ae

With an appetite to create a paradigm shift away from the traditional roads, rates and rubbish mindset, the City's willingness to lead the sector and collaborate on local, national and international levels is gaining attention.

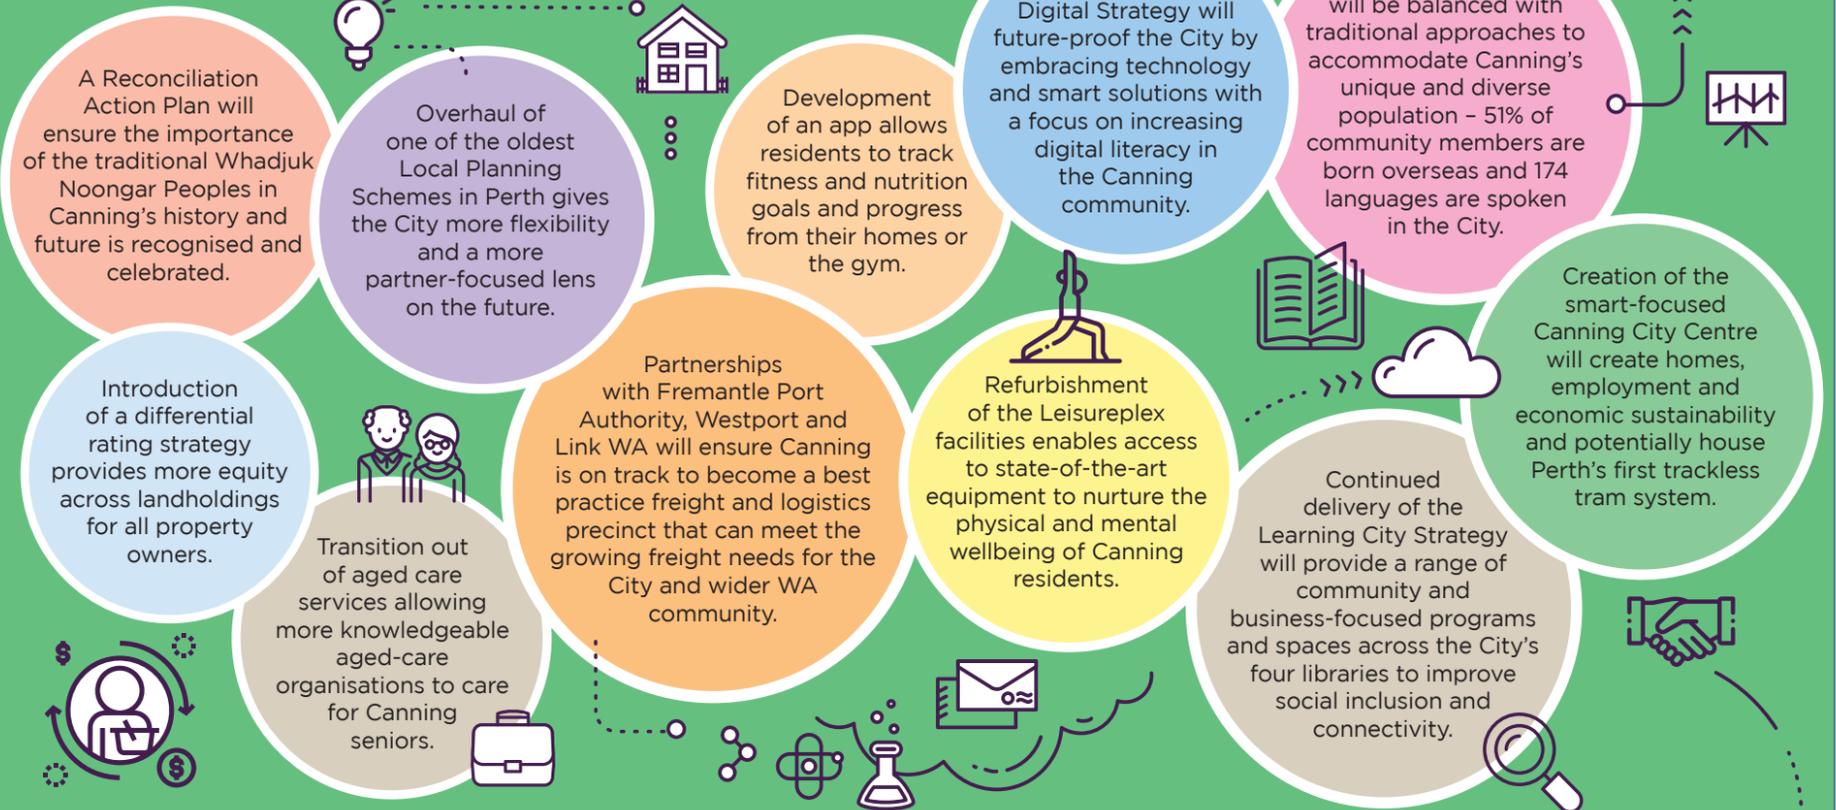

Partnerships with Curtin University and State Government agencies will create better outcomes for all global citizens.

Collaboration with Federal and State Governments and agencies to deliver Canning's first next generation smart park - Wharf Street Basin - as part of the 10-year Canning City Centre project to create Perth's CBD of the south.

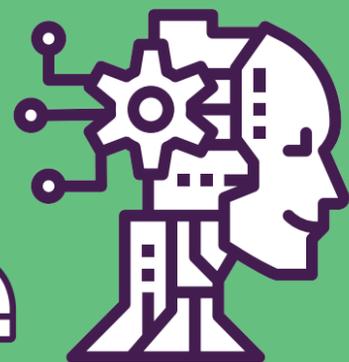

KEEPING IT ALL SUSTAINABLE

Refusing to orbit in the typical way, Canning is committed to a journey of sustainability on all levels - social, economic and environmental - and is well placed to achieve these goals thanks to its forward-thinking Council who has the wellbeing of its people and the environment at the core of every decision.

DARING TO BE DIFFERENT

› Canning is getting noticed for being the local government that's being bold, creative, willing to take risks and make difficult decisions.

› It's getting noticed for creating and implementing projects that traverse the local government space, delivering more for residents and ratepayers.

› It's getting noticed for taking a more flexible and agile approach to business and developing partnerships which pioneer new and different ways of doing things for the benefit of all people.

› It's a fundamental change the City is proud of and there's no sign of Canning slowing down any time soon.
